

# Strategic Assessment

Strategic technology plan and cost options to achieve patient care goals

Technology Survey / Network Evaluation / **Strategic Assessment**

With a focus on future strategic requirements, our team will spend a week or more understanding all aspects of your network. Starting with a comprehensive assessment of your closet configurations, network design and supporting documentation, we'll align your business strategy with your technology vision to pinpoint the recommended actions and estimated costs to deliver the infrastructure you need.

## What it is:

The Strategic Assessment delivers a detailed technology plan that defines current state, desired future state and each stage in between.

Provides the framework to guide strategic discussions and ensure future alignment of technology expectations with patient care outcomes and business objectives.

Includes an extensive onsite assessment and comprehensive review of each network domain.

## Who it's for:

Ideal for Executives who need detail costing scenarios to prepare long-term strategic plans and capital investment budgets.

Arms IT leaders with specific evidence to present infrastructure business cases aimed at delivering operational and patient care goals.

## What you get:

The Strategic Assessment outlines options and costing models to build an adaptive and flexible network that improves care delivery.

Receive a full equipment analysis with specific actions and a prioritized roadmap outlining each critical network transformation phase.

Includes a cost matrix for managed environments across three performance levels: Current, EHR Automated, Fully Automated.

## LAN Strategic Assessment

- Closet-by-closet assessment of hardware and environmental conditions.
- Full equipment review with specific recommendations.
